DECLARATION

We, as the people of SEEDS, adopt this Constitution as our living compass, to co-create the evolutionary systems, cultures, and tools for thriving civilisations and the regeneration of our planet.

ARTICLE 1 – Our Vision

Humanity as wise, joyful and loving partners, co-creating a flourishing world together, with our Earth and the Web of Life.

- *Cultures rooted in compassion, insisting on informed and transparent decisions about the ways we meet our needs as responsible future ancestors, in partnership with our Earth, and honouring the gifts we all share.*
- *Our economic, financial, and governance systems honour the carrying capacities of our Earth and regenerate the multiple dimensions of life we share, thus increasing the caring and carrying capacities of our worlds.*
- *Our societies have become diverse and fertile gardens of abundance that are overflowing with art, song, music, dance and joy; blooming with multispecies cities, drinkable rivers, thriving oceans, fertile living-soil, nourishing air, and compassionate-food.*

ARTICLE 2 - Our Purpose

To serve the Regenerative Renaissance
by co-creating economic, governance,
and financial systems for
regenerative and thriving civilisations.

ARTICLE 3 - Our 3 Principles of Life

3.1 We acknowledge how our universe exists and evolves as a single unified entity, an undividable wholeness. ***The universe is a single unified being.***

3.1.0. This evolutionary principle helps us understand how we each form part of that wholeness and how to design and relate from this wholeness.

.

ARTICLE 3 - Our 3 Principles of Life

3.2 We acknowledge how our universe evolves coherently and is finely tuned to make life possible. ***The universe evolves through deepening coherence and increasing complexity.***

3.2.0 This evolutionary principle guides us how to evolve and embody complexity in a way that is coherent with the wisdom of life, to finely tune our systems to become more generative (as opposed to the self-destructive trajectories of dominating systems).

ARTICLE 3 - Our 3 Principles of Life

3.3 We acknowledge our universe as an expression of consciousness, a continual learning journey of discovery through which we develop our capacities to thrive together. **We actualize our consciousness by learning, experimenting, collaborating, reflecting, and sharing together.**

3.3.0 *This evolutionary principle reminds us to honour **systemic autonomy and autopoiesis** (self-creation, regulation and adaptation) in the way we grow and evolve this Renaissance as a consciousness actualizing process.*

ARTICLE 4 - Our 5 Guidelines for the SEEDS operating systems (SoS)

4.1 - ARCHITECTING CODES AND PROTOCOLS

4.2 - EXPANDING FUTURE POSSIBILITIES

ARTICLE 13 - The Earth & Non-Human Life

13.0 SEEDS explicitly seeks to **give voice to the Earth and all of Life's relations**, including non-human life, and the ecologies of life such as - ecosystems, succession systems, water, nutrients, and climate cycles, and more. Accordingly, we honour the Rights of Nature, and support the International Movement for these Rights to obtain legal standing (a voice and stake in our economies and governance).

13.1 We take the position that **we are all indigenous to our Earth**. We thus commit to include the voice of the Earth and non-human life in what we do within SEEDS, and how we evolve our protocols, tools, and systems.
